

Help Improve Air Travel for Older Adults

We are inviting adults aged 60 and older to share their air travel experiences.

Researchers at the University of Ottawa want to better understand what makes air travel easier or more challenging for older adults.

Who can take part?

- Adults aged 60+ who have travelled by air in the past 3 years (at or after age 60)

What participation involves:

- A one-time online survey
- Takes about 15-35 minutes, depending on responses
- Complete at your own pace
- Participation is voluntary and confidential

How to take part:

- Survey link: <https://www.surveymonkey.ca/r/6ZXWNLL>

Your experiences can help inform future improvements in air travel and make journeys more age-friendly.
